

## Clark Forklift Parts

Clark Forklift Part - Presently, there are at least 350,000 Clark forklifts performing globally, and upwards of 250,000 in service in North America alone. With five major lines across the world, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 distinctive designs of forklifts, with components covering more than 120,000 specialized items for all of its automated equipment. Your local Clark Dealer is your total source for availability of all your components requirements supplied by Clark Totalift.

Clark has a exceptional Parts Supply team. The items warehouses are conveniently located in Changwon, South Korea and Louisville, Kentucky to ensure exceptional service to both their buyers and their sellers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Driven to offer the highest level of value and service to our customers, Clark remains on the cutting edge when it comes to enhancing output and benefiting performance.

Internationally, Clark has one of the most outstanding dealer support networks. With over 550 locations worldwide, supplier representation in over 80 nations and 230 locations in North America, their high level of dedication to their customers predominates the materials handling market.

Clark proudly remains an innovative leader of the material handling industry, revolutionizing safety features such as the worker restraint system. This exceptional dedication to safety is at this time a standard feature on every forklift.

Clark has a unyielding goal to possess the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be globally certified with quality standard ISO 9001 in all of its manufacturing facilities. Furthermore, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be ready for any number of environmental restrictions, thus placing them in a dominant industry position.

Clark has preferred the very economical and beneficial structure of "Lean Production" for its assembly plants and use of resources. This system was established to acknowledge the most successful approaches of production facility management and ensuring maximum efficiency. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Clark's product engineers and suppliers join together to enhance the efficiency and brilliance of their merchandise while minimizing expenses. The contemporary value engineering agenda combines modern product growth and delivers improved client support and service within the industry.
