

Forklift Fork Positioners

Fork Positioner for Forklifts - A fork positioner is a tool constructed out of high quality materials meant to endure the most difficult operations and work environments. This particular piece of equipment can enable the individual driving to maneuver the forks hydraulically without leaving the seat. Side shifting models have the added ability to laterally position the arms or the entire load so as to facilitate much more exact carrying and placement in a quicker and much more efficient way.

The only one of its kind blade pocket design could enable operators to be able to safely sway the unit's forks without any worry of destroying the positioning cylinders. This could allow the operator the alternative to either perform simultaneous or independent fork movement, depending on the job requirement. For most lift trucks with non-OEM carriages, complete carriages are necessary. Standard OEM carriages could be converted into fork positioners on available units.
